-  linkedin.com/in/manusolerj

EDUCATION :

SEVERO OCHOA · 2023 - 2025

Higher Vocational Diploma in Web Application Development (Spanish "Técnico Superior en Desarrollo de Aplicaciones Web", EQF Level 5)

ESCUELA DE LA ORGANIZACIÓN INDUSTRIAL (EOI) · 2024

Full Stack Development with Angular and Microservices

SKILLS :

- Backend: Java, Spring Boot, REST APIs
- Frontend: Angular, TypeScript, JavaScript, HTML5, CSS, Tailwind
- Databases: SQL, MySQL/ PostgreSQL
- Tools: Git, Docker, Docker Compose, Linux, Maven, Postman, GitHub Actions

LANGUAGES :

- Spanish - Native
- English - C1 (EF SET certified)
- Valencian - A2

PROFILE :

Junior full stack developer trained in web application development, with hands-on experience in Java/Spring Boot and Angular. I have built and deployed a complete web application on my own Linux server using Docker, a REST API and JWT authentication. Looking to join a team where I can keep growing as a developer. Available in Alicante, Valencia and remote.

EXPERIENCE :

Web Development Intern · CONVOTIS Iberia · Mar 2025 – Jun 2025

- Developed web applications with Angular and TypeScript: components, routing, forms and REST API consumption.
- Implemented and tested REST endpoints, validating requests and responses with Postman.
- Worked with Git version control alongside the development team.

PROJECTS :

Pokémon Teambuilder · Personal full stack project

pokemon-team-builder.com · [Frontend](#) · [Backend](#)

Web application for building and managing competitive Pokémon teams, with user accounts and persistent storage.

- Built the backend in Java and Spring Boot: REST API with Spring Security and JWT authentication, PostgreSQL persistence and transactional email over SMTP.
- Built the frontend in Angular and TypeScript with Tailwind and PrimeNG, consuming the API and handling sessions and route guards.
- Deployed it myself: Docker containers with separate development and production configurations on a Linux server, exposed through Cloudflare Tunnel, with image storage on Cloudflare.

Necobot · AI-powered Discord chatbot - github.com/ManusolJ/Necobot

- Developed in TypeScript on the Sapphire framework, integrating the Discord API, with SQLite, versioned migrations and scheduled tasks.
- Integrated a locally hosted AI model via Ollama. CI with GitHub Actions and containerised deployment on a personal server.
